

# IN-CLASS Exercise: 3

Given an Array names = ["James", "Jack", "Flora", "Mikhail"].

Write a Javascript code find number of characters in each name and display them in the Browser! {note: not console.log()]

Tips: To show the contents in HTML, use 'document.getElementById' or 'document.getElementsByClassName' to access a DOM element (eg. <p> </p>) and change the text.

Do it in Break-out Rooms and submit your code to LimuNUS->In-Class Exercise-3.
